

**Aerospace and Marine International (AMI) Offshore services are specially designed for industrial activities in the coastal and offshore environments.**

Our accurate and reliable weather information supports your successful planning, scheduling, operational safety and efficiency.

AMI Fully networked, operational centers deliver **total global weather forecasting support.**

*"On behalf of the entire crew of the Wolraad Woltemade, I would like to thank you for a good job, very accurate and most useful in helping us avoid the adverse weather, especially currents, which have such a large influence on jobs of this nature when we are making such slow speeds."*

*- Captain Ralph J Laing, Officers and Crew -*

**SERVICES**

**AMI offers a complete range of services for all types of operations both offshore and inshore including:**

- Oil and gas exploration and production
- Ocean tows and rig relocations
- Seismic data acquisition
- Marine construction and decommissioning
- Cable laying and maintenance
- Ship lightering
- Coastal engineering
- FPSO/FSO operations

**Our standard offshore forecast provides:**

- Detail weather / sea forecasts
- Easy to read tabular data
- Graphical wind and wave charts
- Weather description enhancements
- Tropical cyclone forecasts
- Various forecast range options
- Optional forecasts for visibility, precipitation, clouds, and structure icing

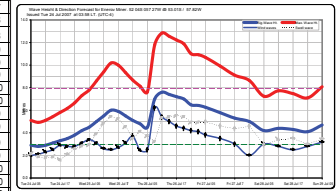

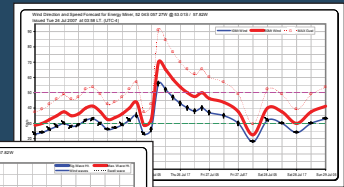

**Text and graphical forecasts can be further supplemented with weather charts showing:**

- Surface pressure and upper air heights
- Wind speed and direction
- Wave heights
- Tropical cyclone tracks and intensities
- Satellite images
- Surface current setting and direction
- Structural and pack ice conditions
- Visibility

**ACCESS**
